EL PRESEDENT ***

At this time of the year, when our thoughts are especially directed toward Thanksgiving, I find myself eager to express my thanks to our wounderfull membership for their hospitality and co-operation. I am grateful, too, that there are such fine Amateurs all over the land whose lives are a fitting tribute to the finest principles of our fraternity, amd whose actions are making Amateur Radio prosper, improve and grow.

With plans for a banquet and field day underway, I would greatly appreciate your usual fine response to these affairs. Each and everyone make all the effort to attend, and try to bring some of the others, and get them back in the fold.

I am more that pleased to hear, on the air, the three recently licensed members. This is a step forward, not only for our fraternity, but for the community as a whole. You older members continue to talk up Amateur Radio and lets get more young blood interested and on the air locally.

Please support your club news sheet, by sending in any and all news to your secretary in time so that he can get it printed in the next issue. Your club is only as good as you make it, so lets all support the club (TARC) and its activities.

Respectfully yours es 73s TEX * W3RZV
